ABRASION RESISTANT  
STEEL FOR DEMANDING  
PRODUCTS

## Raex<sup>®</sup>, reliable quality

Raex<sup>®</sup> abrasion-resistant steel is a product that simply won't let you down. The steel's robust behavior from batch to batch improves productivity and offers predictable wear life for your end application. Predictability and cost efficiency across a range of applications – that's why customers rely on Raex<sup>®</sup> abrasion-resistant steel.

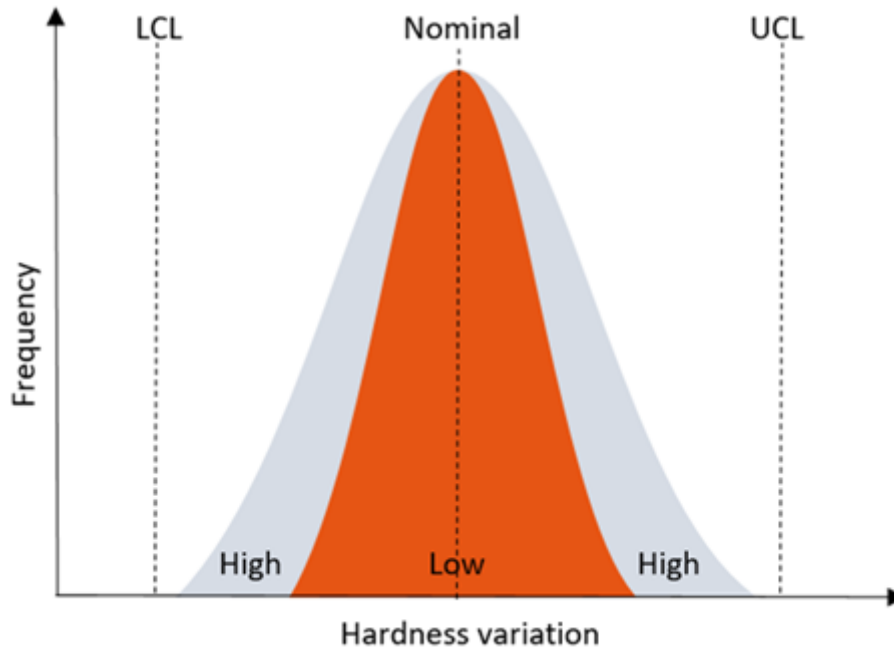

## What is Raex®?

A quality brand with an excellent reputation, Raex® is the result of decades of product development. When you purchase Raex® steel, you're getting a high-quality product that is ready for even the most demanding jobs. Raex® steel has been specially optimized for abrasive environments, as well as easy processing in the workshop. Outstanding hardness performance, skin hardness and superior plate appearance give all Raex® users a competitive advantage.

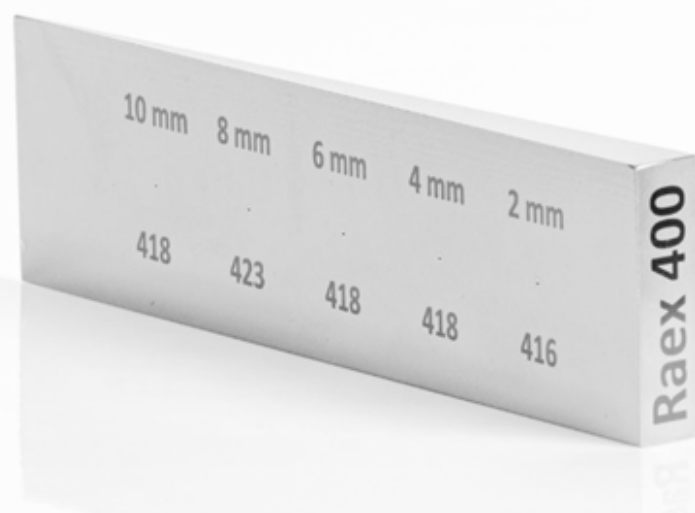

## Robust in all processing steps

Working Raex® is easy thanks to its good cutting, welding and bending properties. Its outstanding performance means that the quality of the product is uniform from batch to batch, ensuring little variation in workshop properties. Especially accurate hardness performance translates into repeatability in the workshop, minimizing quality deviation between batches. The robustness of Raex® steels offers cost efficient, reliable manufacturing for you as a user.

## Predictable and longer wear life

The steel's high and reliable quality offers predictable wear life for the end application. Raex® steel's constant hardness profile and excellent skin hardness provide good wear resistance properties in every wear application. Its hardness aims to be higher than the nominal value, extending the wear life of the finished product.

## Get a competitive advantage with Raex®

Thanks to Raex® steel's high performance, you can expect higher productivity in the workshop. With superior surface quality and outstanding flatness, the need for levelling or repairing is minimized when finishing the product.

High hardness performance brings advantages to equipment and attachments thanks to more predictable behavior and longer product lifetime. Longer lifetime and less variation in hardness will extend the time in operation, meaning fewer maintenance breaks and stoppages during production. Improved maintenance planning, less downtime, and a lower risk of machine breakdown are all possible due to the high quality and predictable performance of Raex®. With Raex®, you can expect some major productivity gains that will make your business more competitive.

**Raex®** ABRASION  
RESISTANT STEEL

Raex® offers a complete range of abrasion-resistant steels through the global Raex® distribution network. With its dependable quality and reliable performance, it delivers great value for all your typical wear applications. Raex® is manufactured by SSAB and sold through the global Raex® distribution network.
